

## REMARKS

Receipt of the Office Action of June 8, 2007 is gratefully acknowledged.

Claims 15, 16, 18 and 20 - 28 have been re-examined with the following result: claims 15, 16, 18, 20 - 22 and 25 - 28 are finally rejected under 35 USC 102(b) by Drete et al; and claims 23 and 24 are finally rejected under 35 USC 103(a) by Drete et al.

In an effort to place this application in condition for allowance, claims 26 - 28 have been cancelled leaving only method claims 15, 16, 18 and 20 - 25. Of these only claim 15 has been amended to recite that each static data transfer occurs as binary state values. This distinction should clearly distinguish over Drete et al.

More specifically, with Drete et al, when an identical data matrix is transferred the exclusive OR logical operation applied to the previous and current images (data) of the matrix will be zero. On the other hand, when the data matrix transferred includes, for example, only one common data entry, then no data reduction is possible except for the one data entry. See, col. 11, lines 58 - 68 and col.12, lines 1 - 10 of Drete et al. Note also the previous image : A for ASCII value and the Current image: A for ASCII value in col. 11. The Exclusive OR result is 0 for all values because there is no change.

With the present invention, this result cannot occur, and to express this distinction, claim 15 identifies static data and dynamic data. The dynamic data shows a change whereas the static data is reflected by binary state values. In this

regard each static data entry is represented. Accordingly, the term "each" has been introduced to make this point clear.

Since Drete et al does not teach or suggest the distinction noted, it cannot, it is respectfully submitted anticipate nor render obvious claim 15, and those claims which depend from claim 15.

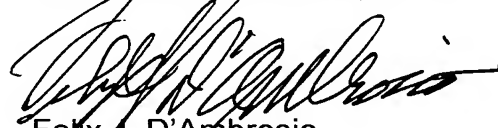

Entry of the noted amendment to claim 15 is respectfully requested and claims 15, 16, 18 and 20 - 25 found allowable.

Alternatively, entry of the noted amendment to claim 15 for purposes of appeal is respectfully requested.

Date: September 10, 2007
